For my personal contributions, I mainly used it for grammar checking and sentence rewriting to make the text more concise. None of the actual content presented in the report was fully AI-generated.

Unrelated: the AI also came up with the app's name.

AI generated text has the tendency to be way too long and adjective-heavy. All of the text returned by the AI had to be rescanned manually to fit the tone of the report. In some cases the prompts had to be done 2-3 times to get acceptable results.

13. Did you at any point abandon using AI tools and seek other resources? Explain your answer. \*

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

No, I only used it for what I wanted to.
